CITY OF BEVERLY HILLS

PUBLIC WORKS SERVICES DEPARTMENT

MEMORANDUM

TO: PUBLIC WORKS COMMISSION

FROM: Trish Rhay, Assistant Director of Public Works Services – Infrastructure & Field Operations

David Hillyer, Water Quality Specialist

DATE: June 11, 2015

SUBJECT: Annual Consumer Confidence Report (CCR)

ATTACHMENT: 2014 CCR Postcard to Beverly Hills Water Customers

---

Background

The Consumer Confidence Rule requires public water suppliers that serve the same people year round (community water systems) to provide consumer confidence reports (CCR) to their customers. These reports are also known as annual water quality reports or drinking water quality reports.

The CCR summarized information regarding sources used (i.e., rivers, lakes, reservoirs or aquafers) any detected contaminants and compliance and educational information. The reports are due to customers by July 1st of each year.

Eight Content Requirements of a CCR

- **Water System Information** – Name/phone number of a contact person; information on public participation opportunities.
- **Source(s) of Water**
- **Definitions** – Maximum Contaminant Level (MCL); MCL Goal (MCLG); Treatment Technique (TT); Action Level (AL); Maximum Residual Disinfectant Level (MRDL); MRDL Goal (MRDLG)
- **Detected Contaminants** – A table summarizing reported concentrations and relevant MCLs and MCLGs or MRDLs and MRDLGs; known source of detected contaminants; health effects language.
- **Information on Monitoring for Cryptosporidium, Radon, and Other Contaminants** (if detected).
- **Compliance with Other Drinking Water Regulations** (any violations and Ground Water Rules [GWR] special notices).
- **Variances and Exemptions** (if applicable)
- **Required Educational Information** – Explanation of contaminants in drinking water and bottled water; information to vulnerable populations and Cryptosporidium; statements on nitrate, arsenic, and lead.

Summary

In 2014, the City of Beverly Hill delivered 3.9 billion gallons of high quality drinking water to our customers from both our treatment plant and Metropolitan Water District. The water treatment plant operated 140 days in 2014 producing 175.6 million gallons.

Over the year, staff collected 3,417 regulatory required sample and approximately 28,700 internal process control samples. All samples met the United States Environmental Protection Agency and California Department of Public Health prescribed regulations that limit the amount of certain components in the water provided from the City of Beverly Hills.
