## Architectural Commission Report

---

**Meeting Date:** Wednesday, February 15, 2012

**Subject:** **9221 WHITWORTH DRIVE (462 SOUTH MAPLE DRIVE)**  
Request for approval of a new four-story condominium building.  
(PL1202054)

**Project applicant:** Leslie Lippich, AIA

**Recommendation:** Conduct public hearing and provide the applicant with design direction.

---

### REPORT SUMMARY

The applicant is requesting review and approval of a new four-story condominium building to be located at 9221 Whitworth Drive (aka 462 South Maple Drive). The project is located on a corner lot. A request for a Development Plan Review (DRP) and Tentative Parcel Map for this project was conditionally approved by the Planning Commission on December 8, 2011 (see Resolution No. 1626 attached). Per conditions #9 and #11 of the Planning Commission (PC) approved Resolution, the PC has directed that the Architectural Commission, during its review, pay specific attention to the building modulation and articulation and the roof overhang design.

### ZONING CODE COMPLIANCE

Applications for design review are preliminarily evaluated for compliance with the zoning code. Applicants are encouraged and have the option of requesting a comprehensive review separate and apart from this application. Formal compliance review will occur when a building permit application is filed (plan check). The applicant has been advised that changes during plan check may require revisions and subsequent approval from the Architectural Commission or staff, as appropriate.

### ENVIRONMENTAL ASSESSMENT

The subject project is exempt from the California Environmental Quality Act (CEQA – Public Resources Code §§21000 – 21178), pursuant to Section 15061(b)(3) of the State CEQA Guidelines in that the project includes the review of building design, colors and materials to the façade of the building, front yard landscaping or minor low-scaled accessory structures, such as fences or walls. It can be seen with certainty that there is no possibility that the subject activity could result in a significant effect on the environment.

### PUBLIC OUTREACH AND NOTIFICATION

Public notification was not required for this project.

#### Attachment(s):

- A. Planning Commission Resolution #1626
- B. Detailed Design Description and Materials (Applicant Prepared)
- C. Design Plans, Cut Sheets and Supporting Documents
- D. Approval Resolution

**Design Review Commission Report**

455 North Rexford Drive  
AC Meeting –February 15, 2012

**Attached A:**  
Planning Commission  
Resolution #1626

RESOLUTION NO. 1626

A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF BEVERLY HILLS CONDITIONALLY APPROVING A REQUEST FOR A TENTATIVE PARCEL MAP AND DEVELOPMENT PLAN REVIEW PERMIT TO ALLOW THE CONSTRUCTION OF A NEW FOUR-UNIT RESIDENTIAL CONDOMINIUM DEVELOPMENT ON THE PROPERTY LOCATED AT 9221 WHITWORTH DRIVE.

The Planning Commission of the City of Beverly Hills hereby finds, resolves and determines as follows:

Section 1. Maple Drive Villas, LLC, the property owner, of 9221 Whitworth Drive, ( the “Applicant”) has submitted an application for Tentative Parcel Map No. 71711 and a Development Plan Review Permit to allow a four-unit, four-story residential condominium development in the Central Area of the City at 9221 Whitworth Drive (the “Project”).

Section 2. The project site is located on the northeast corner of the intersection of Whitworth Drive and South Maple Drive. The area surrounding the project site consists of multi-family residential apartments and condominiums with varying densities, building ages, and architectural styles.

The project site is currently developed with a two-story, seven-unit apartment building. There are seven covered on-grade parking spaces with access from both Whitworth Drive and the alley directly adjacent to the project site. All existing structures would be demolished to accommodate the new condominium building.

The Project will be comprised of four units totaling 14,771 square feet in area at or above grade and four stories in height. The four units will range in size from 3,144 square feet to 3,407 square feet. Each unit will consist of four bedrooms. The Project includes a one-and-a-half level (split) subterranean garage with 13 fully accessible parking spaces. The Project is required to provide 607 square feet of modulation, and meets this requirement by providing 611 square feet of modulation at the northwest and southwest corners of the building. Additionally, the Project provides 885 square feet of outdoor living space in both private and public areas, which exceeds the 800 square feet of outdoor living space required by the Municipal Code.

Section 3. The Project has been environmentally reviewed pursuant to the provisions of the California Environmental Quality Act (Public Resources Code Sections 21000, *et seq.* ("CEQA")), the State CEQA Guidelines (California Code of Regulations, Title 14, Sections 15000, *et seq.*), and the City's Local CEQA Guidelines (hereafter the "Guidelines"), and the City's environmental guidelines, and a Class 2 Categorical Exemption has been issued in accordance with the requirements of Section 15302 of the Guidelines for construction associated with replacement or reconstruction of existing structures. Additionally, the Project qualifies for a Class 3 Categorical Exemption in accordance with the requirements of Section 15303 of the Guidelines for construction associated with new multi-family residential structures of not more than six dwelling units in an urbanized area. Therefore, the Project will not result in a significant environmental impact.

Section 4. Notice of the Project and public hearing was mailed on November 28, 2011 to all commercial and multi-family residential property owners and residential tenants

within a 300-foot radius of the property and to all single-family property owners and residential tenants within a 500-foot radius of the property. Additionally, notice of the Project and public hearing was published in two newspapers of local circulation on November 24, 2011 and November 25, 2011. On December 8, 2011 the Planning Commission considered the application at a duly noticed public meeting. Evidence, both written and oral, was presented at the meeting.

Section 5. In considering the request for a Tentative Parcel Map, the Planning Commission considered the following criteria:

1. Whether the proposed map is consistent with applicable general and specific plans;
2. Whether the design or improvement of the proposed subdivision is consistent with applicable general and specific plans;
3. Whether the site is physically suitable for the type of development;
4. Whether the site is physically suitable for the proposed density of development;
5. Whether the design of the subdivision or the proposed improvements are likely to cause substantial environmental damage or substantially or avoidably injure fish or wildlife or their habitat;
6. Whether the design of the subdivision or type of improvements are likely to cause serious public health problems; and

7. Whether the design of the subdivision or type of improvements will conflict with easements, acquired by the public at large, for access through or use of, property within the proposed subdivision.

Section 6. Based on the foregoing, the Planning Commission hereby finds and determines as follows:

1. The proposed map is consistent with the Beverly Hills General Plan and the objectives, policies, general land uses, and programs specified therein. The General Plan land use designation for the project site is Multi-Family Residential Medium Density. The proposed map includes four residential condominium units, which are in conformance with the General Plan land use designation and Zoning Code for the project site. Therefore, the map is consistent with the Beverly Hills General Plan. The project site is not located within a specific plan area.

2. The proposed design and improvement of the subject property are consistent with the Beverly Hills General Plan and the objectives, policies, general land uses, and programs specified therein. The proposed map includes four residential condominium units, which are permitted under the General Plan land use designation and Zoning Code for the project site. Therefore, the map is consistent with the Beverly Hills General Plan. The project site is not located within a specific plan area.

3. The site is physically suitable for the type of development proposed. The site is currently developed with a seven-unit, two-story multi-family residential building. Under the density limitations set forth in the Beverly Hills

Municipal Code, the project site could be developed to a maximum density of eight units. The current proposal is to construct four units. The site is rectangular in shape, does not contain varying topography, and is capable of supporting the type of development proposed.

4. The site is physically suitable for the proposed density. Under the density limitations set forth in the Beverly Hills Municipal Code, the project site could be developed to a maximum density of eight units. The proposed density of four units is below what would otherwise be permitted and adequate public facilities exist to serve the proposed project.

5. Based on the proposed density of four units, the Project is categorically exempt under the California Environmental Quality Act. Furthermore, the Project site is located within a developed urban setting that does not contain habitat suitable for fish or wildlife. Therefore, the development is not anticipated to cause substantial environmental damage or substantially or avoidably injure fish or wildlife or their habitat.

6. The design of the subdivision and type of improvements are not anticipated to cause serious public health problems. The Project has been designed in accordance with all applicable Public Works and Building and Safety development standards, and is therefore not anticipated to cause serious public health problems.

7. The design of the subdivision and type of improvements have been reviewed by the Department of Public Works and have been found not to be in conflict with any public easements. Further, a 2.5' dedication will be provided along the alley to the east of the property in accordance with the City's Street Master Plan to improve

access along the alleyway. Therefore, the design of the subdivision and type of improvements are not anticipated to conflict with any public easements for access through or use of the property within the proposed subdivision.

Section 7. In considering the request for a Development Plan Review Permit, the Planning Commission considered whether the Project would have a substantial impact on the following criteria:

1. Whether the proposed plan is consistent with the general plan and any specific plans adopted for the area;
2. Whether the proposed plan will adversely affect existing and anticipated development in the vicinity and will promote harmonious development of the area;
3. Whether the nature, configuration, location, density, height and manner of operation of any commercial development proposed by the plan will significantly and adversely interfere with the use and enjoyment of residential properties in the vicinity of the subject property;
4. Whether the proposed plan will create any significantly adverse traffic impacts, traffic safety hazards, pedestrian-vehicle conflicts, or pedestrian safety hazards; and,
5. Whether the proposed plan will be detrimental to the public health, safety or general welfare.

Section 8. Based on the foregoing, the Planning Commission hereby finds and determines as follows:

1. As conditioned, the Project meets the Code requirements for multiple-family residential developments and is consistent with the goals and policies of the Beverly Hills General Plan and its associated land use designations. Furthermore, the Project is not located within or adjacent to a specific plan area.

2. The Project is located in an area that consists primarily of two-story multi-family developments; however, the properties directly to the north and west of the Project site contain buildings that are five stories and three stories in height, respectively. The proposed four-story condominium residential building will complement the adjacent development, and the proposed design of the Project will be a harmonious addition to the area. Furthermore, the modulation provided at the northwest and southwest corners of the building, facing South Maple Drive, softens the massing of the Project.

3. There is no commercial development proposed with the Project and as such, no adverse impact is anticipated.

4. Based on a review by the City's Transportation Division, the project is not expected to generate significant traffic and no measurable impact on the adjacent intersections, streets and alley is anticipated. As conditioned, the Project will not generate traffic safety hazards that may result. Furthermore, as access to the garage is available only from the alley, and as a result, no pedestrian-vehicle conflicts or pedestrian safety hazards are anticipated.

5. The Project will be built in accordance with the City's Building Code standards and is consistent with the zoning for the area. As such, the Project is not anticipated to be detrimental to the public health, safety or general welfare.

Section 9. Based on the foregoing, the Planning Commission hereby grants the requested Tentative Parcel Map and Development Plan Review Permit, subject to the following conditions:

1. The Project shall be modified to provide roof access for fire suppression personnel access and egress from stairwell #2, located at the rear of the building. An alternative design may be approved by the Fire Chief, or designee.

2. Final plans shall include all documentation and specifications necessary for fire sprinklers and fire alarms.

3. Final plans shall show a section indicating the ramp slope leading to the subterranean garage begins after the 2.5' alley dedication.

4. Subject to review and approval by the City's Transportation Engineer, the opening of the garage shall provide adequate setbacks so as to satisfy the minimum turning radius for a typical passenger vehicle (25.8') to cover the path of the front overhang.

5. The garage gate shall be installed at a minimum distance from the alley to provide sufficient room for at least one vehicle to queue at the garage gate without obstructing traffic in the alley.

6. A warning light shall be installed at the exit ramp by the alley. Such device shall light up when a vehicle is leaving the garage so as to notice the on-coming traffic in the alley.

7. Any parabolic mirror proposed to improve visibility shall not be placed within any public right-of-way.

8. A sign shall be placed on South Maple Drive indicating the availability of guest parking located in the subterranean garage. All guest parking spaces shall be clearly designated.

9. The Architectural Commission, in its review, shall pay particular attention to building modulation and require additional articulation, as appropriate.

10. The condominium building may extend from 42 feet in height as presented to the Planning Commission to a maximum height of forty-five feet (45'), consistent with the municipal code, provided the additional height is distributed evenly among the four floors.

11. The roof overhang at the fourth floor shall be reduced, or eliminated, as deemed appropriate by the Architectural Commission.

12. The Applicant shall submit a Construction Management Plan to the Department of Community Development for review and approval prior to the issuance of a building permit. The Construction Management Plan shall include, at a minimum, the following:

12.1 Written information about the construction parking arrangement and hauling activities at different stages of construction to be

reviewed by the Engineering Division of Public Works and the Building and Safety Division of Community Development.

12.2 Information regarding the anticipated number of workers, the location of parking with respect to schedule during the construction period, the arrangement of deliveries, hauling activities, the length of time of operation, designation of construction staging area and other pertaining information regarding construction related traffic.

12.3 The proposed demolition/construction staging for the Project to determine the amount, appropriate routes and time of day heavy hauling traffic necessary for demolition, deliveries, etc. to the project site.

13. APPEAL. Decisions of the Planning Commission may be appealed to the City Council within fourteen (14) days of the Planning Commission action by filing a written appeal with the City Clerk. Appeal forms are available in the City Clerk's office. Decisions involving subdivision maps must be appealed within ten (10) days of the Planning Commission Action. An appeal fee is required.

14. RECORDATION. The resolution approving the Tentative Parcel Map and Development Plan Review Permit shall not become effective until the owner of the Project site records a covenant, satisfactory in form and content to the City Attorney, accepting the conditions of approval set forth in this resolution. The covenant shall include a copy of the resolution as an exhibit. The Applicant shall deliver the executed covenant to the Department of Community Development **within**

**60 days** of the Planning Commission decision. At the time that the Applicant delivers the covenant to the City, the Applicant shall also provide the City with all fees necessary to record the document with the County Recorder. If the Applicant fails to deliver the executed covenant and related fees within the required 60 days, this resolution approving the Project shall be **null and void and of no further effect**. Notwithstanding the foregoing, the Director of Community Development may, upon a request by the Applicant, grant a waiver from the 60 day time limit if, at the time of the request, the Director determines that there have been no substantial changes to any federal, state or local law that would affect the Project.

15. EXPIRATION. Tentative Parcel Map: The exercise of rights granted in such approval shall be commenced within two (2) years after the adoption of such resolution.

16. EXPIRATION. Development Plan Review Permit: The exercise of rights granted in such approval shall be commenced within two (2) years after the adoption of such resolution.

17. VIOLATION OF CONDITIONS: A violation of these conditions of approval may result in a termination of the entitlements granted herein.

18. This approval is for those plans submitted to the Planning Commission on December 8, 2011, a copy of which shall be maintained in the files of the City Planning Division. Project development shall be consistent with such plans, except as otherwise specified in these conditions of approval.

19. Minor amendments to the plans shall be subject to approval by the Director of Community Development. A significant change to the approved Project

shall be subject to Planning Commission Review. Construction shall be in conformance with the plans approved herein or as modified by the Planning Commission or Director of Community Development.

20. Project Plans are subject to compliance with all applicable zoning regulations, except as may be expressly modified herein. Project plans shall be subject to a complete Code Compliance review when building plans are submitted for plan check. Compliance with all applicable Municipal Code and General Plan Policies is required prior to the issuance of a building permit.

21. Prior to the issuance of building permits, the design, materials, and finish of the building and landscaping shall be subject to the review and approval of the Architectural Commission.

22. The CC&Rs will be submitted and reviewed by the City Attorney prior to recordation of the final map.

23. Approval Runs With Land. These conditions shall run with the land and shall remain in full force for the duration of the life of the Project.

24. Prior to the issuance of a building permit, all applicable Park and Recreation Facilities Tax required by the Municipal Code shall be paid.

25. The Project shall operate at all times in a manner not detrimental to surrounding properties or residents by reason of lights, noise, activities, parking or other actions.

26. The Project shall operate at all times in compliance with Municipal requirements for Noise Regulation.

27. During the construction period, street sweeping shall be conducted several times a day and as directed by the City Engineer. Dirt shall not be tracked out of the construction site.

28. The Applicant shall remove and replace all public sidewalks surrounding the Project site that are rendered defective as a result of Project construction.

29. The Applicant shall remove and replace all curbs and gutters surrounding the Project site that are rendered defective as a result of Project construction.

30. The Applicant shall comply with all applicable statutes, ordinances and regulations concerning the conversion of residential rental units into condominiums, including, but not limited to, the requirement that the applicant pay the City of Beverly Hills the condominium conversion tax, if a certificate of occupancy is issued prior to approval of the final subdivision map by the City Council. The amount of tax to be paid shall be based on the fees in place at the time of conversion.

31. The applicant shall remove all unused landings and driveway approaches. These parkway areas, if any, shall be landscaped and maintained by the adjacent property owner. This landscape material cannot exceed six to eight inches in height and cannot be planted against the street trees. Care shall be taken to not damage or remove the trees existing tree roots within the parkway area. Remove and replace all defective alley and driveway approaches surrounding the existing and proposed buildings.

32. The applicant shall protect all existing street trees adjacent to the subject site during construction of the proposed project. Every effort shall be made to retain mature street trees. No street trees, including those street trees designated on the preliminary plans, shall be removed and/or relocated unless written approval from the Recreation and Parks Department and the City Engineer is obtained.

33. Removal and/or replacement of any street trees shall not commence until the applicant has provided the City with an improvement security to ensure the establishment of any relocated or replaced street trees. The security amount will be determined by the Director of Recreation and Parks, and shall be in a form approved by the City Engineer and the City Attorney.

34. The applicant shall provide that all roof and/or surface drains discharge to the street. All curb drains installed shall be angled at 45 degrees to the curb face in the direction of the normal street drainage flow. The applicant shall provide that all groundwater discharges to a storm drain. All ground water discharges must have a permit (NPDES) from the Regional Water Quality Control Board. Connection to a storm drain shall be accomplished in the manner approved by the City Engineer and the Los Angeles County Department of Public Works. No concentrated discharges onto the alley surfaces will be permitted.

35. The applicant shall provide for all utility facilities, including electrical transformers required for service to the proposed structure(s), to be installed on the subject site. No such installations will be allowed in any City right-of-way.

36. The applicant shall underground, if necessary, the utilities in adjacent streets and alleys per requirements of the Utility Company and the City.

37. The applicant shall make connection to the City's sanitary sewer system through the existing connections available to the subject site unless otherwise approved by the City Engineer and shall pay the applicable sewer connection fee.

38. The applicant shall make connection to the City's water system through the existing water service connection unless otherwise approved by the City Engineer. The size, type and location of the water service meter installation will also require approval from the City Engineer.

39. The applicant shall provide to the Engineering Office the proposed demolition/construction staging for this project to determine the amount, appropriate routes and time of day of heavy hauling truck traffic necessary for demolition, deliveries, etc., to the subject site.

40. The applicant shall obtain the appropriate permits from the Civil Engineering Department for the placement of construction canopies, fences, etc., and construction of any improvements in the public right-of-way, and for use of the public right-of-way for staging and/or hauling certain equipment and materials related to the project.

41. The applicant shall remove and reconstruct any existing improvements in the public right-of-way damaged during construction operations performed under any permits issued by the City.

42. During construction all items in the Erosion, Sediment, Chemical and Waste Control section of the general construction notes shall be followed.

43. Condensate from HVAC and refrigeration equipment shall drain to the sanitary sewer, not curb drains.

44. Water discharged from a loading dock area must go through an interceptor/clarifier prior to discharging to the storm drain system. A loading dock is not to be confused with a loading zone or designated parking space for loading and unloading.

45. Organic residuals from daily operations and water used to wash trash rooms cannot be discharged to the alley. Examples are grocery stores, mini markets and food services.

46. All ground water discharges must have a permit (NPDES) from the Regional Water Quality Control Board. Examples of ground water discharges are; rising ground water and garage sumps.

47. Storm water runoff from automobiles going into a parking garage shall be discharged through a clarifier before discharging into the storm drain system. In-lieu of discharging runoff through a clarifier, parking lots can be cleaned every two weeks with emphasis on removing grease and oil residuals which drip from vehicles. Maintain records of cleaning activities for verification by a City inspector.

Section 10. The Secretary of the Planning Commission shall certify to the passage, approval, and adoption of this resolution, and shall cause this resolution and his/her Certification to be entered in the Book of Resolutions of the Planning Commission of the City.

**SECTION 2 – PROJECT DESCRIPTION / ZONING INFORMATION**

**A Indicate Requested Application**

- Staff Review
  - Three (3) sets of plans required (see Section 6 for plan size requirements).
- Architectural Commission Review
  - Ten (10) sets of plans required (see Section 6 for plan size requirements).
  - Public Notice materials required for Sign Accommodations (see Section 5 for public notice requirements).

**B Identify the scope of work (check all that apply):**

- New construction
- Façade Remodel ONLY
- Business Identification Sign(s)  
Number of signs proposed:
- Building Identification Sign(s)  
Number of signs proposed:
- Sign Accommodation (explain reason for the accommodation request below):  
Number of signs proposed:
- Other:
- Remodel: Int. & Ext, no floor area added
- Remodel: Int. & Ext, floor area added
- Awning(s):  New  Recovery
- Open Air Dining: #Tables # Chairs

**C Describe the scope of work proposed including materials and finishes:**

New 4 story 4 unit condominium project over one level subterranean garage. Type V-A wood frame & stucco building, with precast concrete trim.

**C Identify the Project Zoning (City Zoning Map: <http://gis.beverlyhills.org/UNITEGIS/>)**

- R-4       R-4X       R-4       R-4-P       R-4X2
- R-3       RMCP       C-3       C-3A       C-3B
- C-5       C-3T-1       C-3T-2       C-3T-5       C-5

**E Lot is currently developed with (check all that apply):**

- General Office Building
- Retail Building
- Medical Office Building
- Multi-family Building
- Vacant
- Restaurant
- Other (specify below):

**F Are any protected trees located on the property? (See the City’s tree removal guidelines at: <http://www.beverlyhills.org/services/building/plans/tree.asp>.)**

Yes  No

If YES, provide the following information:

Tree Type:  Heritage Tree(s)       Native Tree(s)       Urban Grove

Species:

Quantity/Sizes:

Reason for Removal:

**G Has the existing structure been designed by a notable architect or is it identified on any historic resource inventory, including the City of Beverly Historic Resources Survey (Verify with the Planning Division if the property is listed on the City’s survey)?**

Yes  No  If yes , please list Architect’s name:

**SECTION 3 – PROJECT DETAILS AND MATERIALS (continues on next page)**

**A** Indicate in the chart below all applicable signage details:

	<u>Type of Sign</u> (i.e. business ID, building ID, parking, etc.)	<u>Dimensions</u> (length x width)	<u>Square Feet</u>	<u>Maximum Area Permitted by Code</u>	<u>Maximum Area Permitted w/ Sign Accommodation</u> (if applicable)
1					
2					
3					
4					
5					

**C** List the specific materials and finishes for all of the architectural features proposed in the project (List N/A, not applicable, for features that do not apply.):

**FAÇADE** (List all material for all portions visible from the street)

Material: exterior plaster, precast concrete trim, stone veneer  
 Texture /Finish: smooth stucco trim painted with elastomeric paint  
 Color / Transparency: x25 Saddleback by Lahabra Stucco, SP 338 Sealpoint by Dunn Edwards & Mojave 20042 Country Ledgestone by Cultured Stone

**WINDOWS/DOORS** (Include frame, trim, glass, metal, etc.)

Material: wood  
 Texture /Finish: stained  
 Color / Transparency: Mahogany stain and clear glass

**ROOF**

Material: type "a" built up composition roofing  
 Texture /Finish: cap sheet  
 Color / Transparency: medium gray. (not visible from street)

**CHIMNEY(S)**

Material: G.I. sheet metal chimney cap  
 Texture /Finish: painted  
 Color / Transparency: DE6306 Gateway Bay by Dunn Edwards

**COLUMNS**

Material: precast concrete columns  
 Texture /Finish: smooth painted  
 Color / Transparency: SP 338 Sealpoint by Dunn Edwards

**BALCONIES & RAILINGS**

Material: wrought iron  
 Texture /Finish: painted, semi  
 Color / Transparency: DE6063 Nlack Walnut by Dunn Edwards

**OUTDOOR DINING ELEMENTS** (List all material for all outdoor dining elements.)

Material: n/a

**D Describe the proposed landscape theme, if applicable. Explain how the proposed landscaping complements the proposed style of architecture:**

The landscape design fits the Italianate style of the building while using drought tolerant plant material. The use of Olives & Junipers enhance the elevations of the building. The varying heights of the plant material give the landscape visual interest as well.

**SECTION 4 – DESIGN ANALYSIS AND FINDINGS (for Commission level applications only)**

**A Clearly identify how your project adheres to each of the required findings of the Architectural Review Commission:**

- 1. Describe how the proposed building or structure is in conformity with good taste and good design and, in general, contributes to the image of Beverly Hills as a place of beauty, spaciousness, balance, taste, fitness, broad vistas and high quality.**

The Maple Drive Villas units will be occupied by four owners, who are already Beverly Hills residence. One unit per floor will allow views in all directions in the spacious elegant floor plan. The architectural style will be "Italianate" which is the most popular in Southern California since 2000.

- 2. Describe how the proposed building or structure indicates the manner in which the structure is reasonably protected against external and internal noise, vibrations, and other factors which may tend to make the environment less desirable.**

Having one unit per floor is less than 60% of the allowed density. The four "empty nester" owners will not create unduly noise or traffic.

- 3. Describe how the proposed building or structure is not, in its exterior design and appearance, of inferior quality such as to cause the nature of the local environment to materially depreciate in appearance and value.**

The project is high quality in exterior materials, the ledgestone will provide intimate elegance for years to come. Also the wood doors and windows are of high quality with double glazing.

- 4. Describe how the proposed building or structure is in harmony with the proposed developments on land in the general area, with the general plan for Beverly Hills, and with any precise plans adopted pursuant to the general plan.**

The project conforms with all zoning, height and set back requirements of the R-4 area and is similar to the newly developed parcels in the immediate surrounding.

- 5. Describe how the proposed development is in conformity with the standards of the municipal code and other applicable laws insofar as the location and appearance of the buildings and structures are involved.**

The projects size and height is within the limitation of the code. The massing & modulation exceeds the requirements and the density is less than 60% of maximum allowed.

**Design Review Commission Report**

455 North Rexford Drive  
AC Meeting –February 15, 2012

**Attached D:**  
Draft Approval Resolution

RESOLUTION NO. AC-17-12

RESOLUTION OF THE ARCHITECTURAL COMMISSION OF THE CITY OF BEVERLY HILLS CONDITIONALLY APPROVING AN ARCHITECTURAL REVIEW PERMIT TO ALLOW A NEW FOUR-STORY CONDOMINIUM BUILDING ON THE PROPERTY LOCATED AT 375 NORTH BEVERLY 9221 WHITWORTH DRIVE (PL1202054).

The Architectural Commission of the City of Beverly Hills hereby finds, resolves and determines as follows:

Section 1. Leslie Lippich, AIA, applicant on behalf of the property owner, Maple Drive Villas LLC (Mazliach Gamliel – President, Eyal Gamliel-CEO), (Collectively the “Applicant”), has applied for architectural approval of a new four-story condominium building to be located at 9221 Whitworth Drive.

Section 2. Beverly Hills Municipal Code Article 30, Chapter 3 of Title 10, authorizes the Architectural Commission the authority to approve, approve with conditions or deny design-related aspects of projects located in the city’s commercial and multi-family districts, subject to findings set forth in Beverly Municipal Code Section 10-3-3010.

Section 3. Consistent with Beverly Hills Municipal Code Section 10-3-3010, this resolution documents the official action of the architectural commission with respect to the project.

Section 4. The subject project has been environmentally reviewed pursuant to provisions of the California Environmental Quality Act (Public Resources Code Sections 21000, *et seq.* (“CEQA”), the State CEQA Guidelines (California Code of Regulations, Title 14, Sections 15000, *et seq.*), and the City’s Local CEQA Guidelines (hereafter the “Guidelines”), and the City’s environmental guidelines, and a Class 2 Categorical Exemption has been issued in accordance with the requirements of Section 15302 of the

Guidelines for construction associated with replacement or reconstruction of existing structures. Additionally, the Project qualifies for a Class 3 Categorical Exemption in accordance with the requirements of Section 15303 of the Guidelines for constructions association with new multi-family residential structures of not more than six dwellings units in an urbanized area. Therefore, the Project will not result in significant environmental impact.

Section 5. The Architectural Commission conducted a duly noticed public hearing on February 15, 2012 at which time oral and documentary evidence was received concerning the application.

Section 6. Based upon the evidence presented at the hearings, including the staff report(s), oral and written testimony, the Architectural Commission hereby makes the following findings:

A. The plan for the proposed building or structure is in conformity with good taste and good design and, in general, contributes to the image of Beverly Hills as a place of beauty, spaciousness, balance, taste, fitness, broad vistas, and high quality. Specifically the project incorporates an appropriate balance of color, high quality materials and appropriate architectural design principles to reinforce the city's urban form and promote the image of Beverly Hills.

B. The plan for the proposed building or structure indicates the manner in which the structure is reasonably protected against external and internal noise, vibrations, and other factors which may tend to make the environmental less desirable. The proposed project is proposed to be constructed

using contemporary building materials and practices, and, as conditioned, complaint with all applicable building codes, including standards that protect against unwanted noise and vibrations.

C. Proposed building or structure is not, in its exterior design and appearance, of inferior quality such as to cause the nature of the local environment to materially depreciate in appearance and value. Specifically, the commission has reviewed the design and construction materials proposed for the project, which incorporates contemporary building material of known quality and durability. Moreover, the project design is appropriate to the building and surrounding improvements and is well matched to the selected materials.

D. As conditioned, the proposed building or structure is in harmony with the proposed developments on land in the general area, with the general plan for Beverly Hills, and with any precise plans adopted pursuant to the general plan. The proposed project complies with the applicable goals and policies set forth in the general plan, and, as conditioned, designed in a manner that complies with local ordinances. The overall design is consistent with and appropriate to other improvements in the general vicinity.

E. The proposed development is in conformity with the standards of this code and other applicable laws insofar as the location and appearance of the buildings and structures are involved. As, conditioned, the project will be designed in compliance with all applicable regulations.

F. The proposed development is designed in a manner that protects and preserves those exterior elements of the building which the planning commission found contributed to the determination of the project as a "character contributing building": in accordance with section 10-2-707 of this title. The proposed project does not include a request and has not been determined by the

planning commission to be a project that qualifies as a “character contributing building” under section 10-2-707. Therefore, this finding is not applicable to the subject project.

Section 7. Based on the foregoing, the Architectural Commission hereby grants the request defined in this resolution subject to the following conditions:

Standard Conditions

1. **Architectural Approval.** Project approval is for the design-related aspects of the project only. No approval is implied or granted with regard to applicable city zoning or technical codes, which may require review and approval from other city commissions or officials.
2. **Compliance with Municipal Code.** Prior to issuance of a building permit, the applicant shall demonstrate compliance with all applicable provisions of the city’s municipal code and applicable conditions imposed by any discretionary review approval.
3. **Compliance with Special Conditions.** Any special conditions that require approval by the director of community development, or designee, shall be submitted to the staff liaison to the commission within fourteen (14) days of approval or prior to submittal of the plan check review application, whichever is greater.
4. **Project Rendering.** Prior to issuance of a building permit, the applicant shall incorporate into the building permit set of plans, an updated color rendering of all building facades. The quality and detail of the rendering shall be subject to approval from the director of community development, or

designee, and shall include sufficient design information to evaluate project compliance during construction.

5. **Approval Resolution.** A copy of the signed resolution of approval shall be scanned onto the cover sheet(s) of the building permit set of plans.
  
6. **Substantial Compliance with Approved Plans.** The director of community development, or designee, shall determine if changes to the approved project are in substantial compliance with the commission's action. This determination shall be subject to applicable fees and charges. A substantial modification to the approved project requires approval from the Architectural Commission.
  
7. **Validity of Permits.** The rights granted by this approval shall remain valid for three (3) years from the date of approval, unless extended pursuant to Beverly Hills Municipal Code Section 10-3-207.

Special Conditions

8. No special conditions are proposed for this project.

Section 8. The Secretary of the Architectural Commission shall certify to the passage, approval, and adoption of this resolution, and shall cause this resolution and its certification to be entered in the administrative record maintained by the community development department.

Section 9. Decisions of the Architectural Commission may be appealed to the City Council within fourteen (14) days of the final action by filling a written appeal and paying appropriate fees with the City of Beverly Hills City Clerk.

Approved as to Form and Content:
