September 28, 2016

City of Planning Commission
City of Beverly Hills
455 N. Rexford Drive
Beverly Hills, CA 90210

Honorable Commissioners:

Each year over 200,000 guests stay at the Beverly Hilton and the Beverly Hilton entertains over 200,000 guests at events in its ballrooms, conference facilities and restaurants. We hold almost 400 large events a year. Virtually every hotel guest, event guest, restaurant guest, and visitor comes to the Beverly Hilton by way of Merv Griffin Way. As we have communicated to you, we have serious concerns about the Wanda project site plan. The plan, as proposed, will diminish the guest experience by interfering with the ability of our guests to arrive and depart the Beverly Hilton. We employ over 700 hard working men and women. The Wanda project site plan threatens their ability to get to and from work every day. Hundreds of thousands of commuters, many of them Beverly Hills residents, use Santa Monica Boulevard and Merv Griffin Way. The Wanda project site plan will impact their ability to get to their home and work every day.

With the completion of the Waldorf Astoria Beverly Hills and the new Beverly Hilton condominiums (whether one building or two), we will have an investment of nearly \$1 billion in Beverly Hills. The Beverly Hilton and the soon to be completed Waldorf Astoria combined will generate over \$17 million dollars a year for police, fire, schools and other essential city programs. And these numbers do not include the many tens of millions of dollars spent in local stores and restaurants in Beverly Hills by our guests or City revenues projected from the Beverly Hilton condominium building(s). As presently planned, the Wanda project will adversely impact the Beverly Hilton, our guests, our residents and our visitors.

Many of the issues with the Wanda project can be addressed with a more rigorous analysis, more questioning of Wanda provided assumptions and a more thoughtful site transportation plan. In 2008, the 9900 Wilshire project estimated that 95,000 cubic yards of soil needed to be excavated. Now Wanda says it is 265,000 cubic years of soil to be excavated,

almost a three times increase. No explanation. But huge real world impacts. That translates into 14,000 additional truckloads and 28,000 additional truck trips. For a project that is supposed to be the same number of square feet as the 9900 Wilshire project, this should certainly raise questions.

Wanda asserted that the Montage only had approximately 50 truck deliveries a week. Since Wanda provided no verifiable counts and staff had not checked their assumption, we asked our transportation consultant to conduct a week of counts. It is 5 times the number Wanda claimed in hearings at the Planning Commission, over 250 weekly deliveries. We have now rechecked some of the numbers to make sure the original numbers were correct. And they are spot on. Again no explanation by Wanda. But huge real world impacts.

And Wanda refuses to provide truck access for commercial uses on their “residential” access road on the west side of the property where they plan to have loading activities—but only for their residents. Clearly, Wanda does not want to inconvenience its residents but it is okay to impact the 400,000 Hilton guests, residents and visitors, not to mention the future residents of the Hilton condominiums.

Because Wanda refused to consider a revised site plan providing access to the new Wanda hotel from the west access road, which is already part of their plan, we developed a workable plan for site access that would help avoid many of these issues. Frankly it wasn’t hard. Took a little time and money. And we were able to provide a real world option that might actually solve some real world problems. We respectfully ask the Commission to consider this reasonable alternative.

There is a sense that the Planning Commission must act quickly on the Wanda proposal. Respectfully, we do not understand this sentiment. The proposed Wanda hotel (set aside the condominium portion) on its own is a major project for Beverly Hills. It consists of over 200,000 square feet of commercial uses. In 2008, the City Planning Commission alone held 10 hearings on the 9900 Wilshire project over a span of more than 7 months. Major projects like this take time to research and analyze. And the implications of the resulting planning decisions will impact the community for decades to come. It is important to get this right and to take whatever time and effort is necessary to do so.

As you requested we are providing to you the information indicated on the attached table of contents together with a narrative explaining in high level detail the overarching transportation issues that Pat Gibson will be reviewing in more detail with you on October 10 as well as some concerns regarding noise issues.

We hope that the information we are providing is helpful. We think it is. Separately we are having our technical consultants review the analysis of nighttime impacts (noise, lighting, etc.) and our transportation consultant (Pat Gibson) is reviewing Wanda’s analysis of the

simultaneous events. That will include corrected information as to the size of Hilton events which Wanda had wrong.

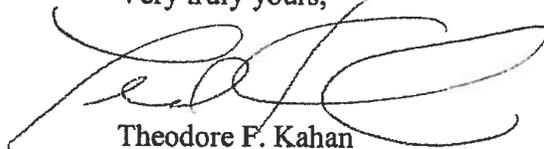

We have two very specific requests.

1. Please ask staff to fully evaluate the west access option with a signalized intersection and loading access for all uses from the west access road.

2. Please ask staff to have Wanda conduct a real world test run (videoed) with 50 double belly dump trucks trying to turn left into the Wanda site between 8am and 10 am.

Thank you for all your work on this matter.

Very truly yours,

A handwritten signature in black ink, appearing to read 'T. Kahan', written over a horizontal line.

Wanda Summary Document

OVERVIEW

The Wanda project presents a fundamental question and a series of difficult issues.

One way to think about the project is to ask whether these two projects can really be considered to have the same impacts:

1. A 42 unit condo with 16,000 square feet of retail ground floor retail; or
2. A 134 room hotel with 20,000 square feet of bars, restaurant, spa and other uses and 8,000 square feet of event space.

Of course they do not, and all the hand waving about numbers will tell you what everyone knows: they are not the same and they will operate very differently within the City.

Which would you want to live next to?

Failure of Site Planning. Wanda could have developed a new master plan for the site to properly incorporate changes to the 2008 approved plan to avoid impacts to Merv Griffin Way and Santa Monica Boulevard. They have plenty of room on the site to avoid many of the real world impacts they are now causing. In fact, they have eight acres to work with. They are not constrained by the size of their site. Wanda instead chose a route involving the minimal site re-planning which will result in major issues for the Beverly Hilton and its guests and visitors and, we believe, the City and its residents.

The proposed Wanda project suffers from a basic failure of site planning related to transportation. And the result will be significant traffic issues for Santa Monica Boulevard, the community, commuters on Santa Monica Boulevard and The Beverly Hilton hotel and the approved Hilton condos.

Wanda has chosen to put its traffic from the new hotel near an intersection (Santa Monica and Merv Griffin Way) that is a very heavily traveled intersection and the front door to the Beverly Hilton.

Wanda could have simply provided for a site plan for the Wanda hotel that used the planned western road adjacent to Los Angeles Country Club for its access. And it could have located access to the truck docks on the west side of the project site off of the new access road for all deliveries for the proposed Wanda hotel. Residential deliveries are already planned in this area. Wanda has simply refused. They have refused despite the fact that Wanda's proposal violates the very planning principles considered and implemented in 2008 when the original residential 9900 Wilshire project and hotel and residential Beverly Hilton project were approved. The City's goal in 2008 was to separate the uses with Beverly Hilton's guests and residents continuing to use Merv Griffin Way while 9900 would use the road along the LA Country Club.

Many hotel condo projects have a unified access. Like the Montage. The City should analyze this option. It will eliminate significant problems posed by the Wanda plan. See proposed west access road plan provided by Hilton.

Lack of Verifiable Numbers and Analysis. Wanda’s numbers are either not verifiable or have not been presented in a clear and open fashion.

1. Wanda has maintained that truck deliveries to the new hotel project will not exceed 54 weekly deliveries. The Wanda team has said that is the number of deliveries for the Montage. Staff took Wanda at its word and did not verify this critical data point. Actual verifiable data presented by the Hilton shows that the Montage had 251 truck deliveries in a week. See data sheets and video. And staff has now done a preliminary county showing 32 in a single day.

2. Wanda has never presented a clear table showing the number of construction trucks required to build its project. Based on data embedded in the air quality study and extrapolated from the Waldorf Construction, it is estimated that the Wanda project will require between 35,000 and 40,000 trucks to excavate the site and provide all the material for the project construction. See truck estimated provided.

3. Of these trucks, Wanda is proposing to have approximately 21,000 dump trucks access the site during a 3.5 month to 6 month period for excavation. All of these trucks will have to make a left turn across Santa Monica Boulevard. They will be making a left turn in and right turn out at the rate of about one a minute or so. It is not feasible and will gridlock traffic on Santa Monica Boulevard. See hauling truck numbers provided. See time lapsed video of Santa Monica Boulevard in the morning peak hours which run past 10:00 a.m.

4. Nighttime excavation won’t solve the left turning movement problem for two reasons. Much of the construction still has to occur during the day and deliveries will have to occur during the day. Further, it is not clear whether night time excavation will be permitted. The City announced recently that it will not allow any nighttime work on the Santa Monica Boulevard improvement project to avoid nighttime disruption to residents.

5. The number of employees presented by Wanda for operations of the hotel are inconsistent with the numbers required to operate a luxury hotel of comparable size. Parking numbers need to be reconciled to address employee parking demand. See employee estimates provided.

6. Wanda is proposing that all 1,140 parking spaces, which is not sufficient to park all the uses on-site, will be valet parked but could not provide an answer as to how many valets will that require and how will that work in peak periods at the hotel. It was “trust me” analytics.

Wanda Transportation Plan Will Not Work. The Wanda transportation plan requires a large number of left turns across Santa Monica Boulevard at two unsignalized locations (new Wanda proposed residential access road on the west side of the project and at the new hotel driveway on Santa Monica Boulevard) as well as left turns at Merv Griffin Way, an intersection operating at Level of Service F.

1. Wanda’s trip generation numbers don’t add up. The nearly 30,000 square feet of restaurants, bars, lounges, function rooms, and banquet facilities are said to require approximately 472 parking spaces at 8:00 p.m. when fully utilized. But Wanda only projects 12 cars turning left into the hotel and commercial uses driveway from Santa Monica Boulevard

during the afternoon peak hours. If there are going to be 472 cars there using Wanda's own numbers, how and when are these cars going to arrive if only 12 an hour are coming from Santa Monica Boulevard?

2. Simultaneous events at the Hilton and Waldorf Astoria (2000 plus persons not include staffing for functions) plus events at the new Wanda hotel (plus "normal" hotel operations) and access to new Hilton condos will create a situation of further intersection failure. This intersection failure will be compounded by the new proposed hotel access onto Merv Griffin Way a mere 78 feet from the intersection. This will occur dozens if not hundreds of times per year. See Hilton event data.

3. Large trucks trying to access or exit the Wanda loading dock proposed for Merv Griffin Way will have great difficulty accessing Merv Griffin Way. See video of actual large trucks trying to make the turn. Cars will have to move out of the way to make the turn onto Merv Griffin Way. Merv Griffin Way is not a public street and cannot handle that level of loading. See graphics of truck turn radius and inability to make turn into loading dock. Large truck turns from Merv Griffin Way into and out of the loading dock will require illegal turns crossing over another turn lane. See truck turning graphics.

4. Even though the Wanda project will have a loading dock on the west side of the project for the residential project, Wanda has refused to use this loading dock for Hotel commercial deliveries, preferring to provide those deliveries at the front door for the Hilton and next to the proposed Hilton condos Trucks will have a far easier time accessing the loading dock on the west access road. See access road graphics.

5. The 35,000 to 40,000 construction trucks will not be able to safely make left turns much of the times across Santa Monica Boulevard. This is a major safety issue. Even if there is nighttime excavation, much of the construction and deliveries will have to occur during the day.

6. 21,000 double belly dump trucks cannot turn left across Santa Monica Boulevard. It will gridlock traffic on Santa Monica Boulevard. And queuing of 50 double belly dump trucks through Century City will shut down east bound traffic. See am peak videos of Santa Monica Boulevard.

7. It defies common sense to think thousands of trucks will be able to turn left without stopping Santa Monica Boulevard traffic. Why not run an actual demonstration and have 50 trucks in one hour try to turn into the Wanda site?

Nighttime Construction Noise. On the north side of the Wanda project is a single family residential community, to the east is the 569 room Beverly Hilton and to the south is the new 42 story residential building. Nighttime construction may have a serious noise and lighting impact on each of these areas.

The Wanda is proposing a "40 foot sounds wall" along Merv Griffin Way to "protect" Hilton guests from noise from construction. The sound wall turns out to be a fabric that lowers and raises at various times. The EIR's modeling tables show the fabric wall has no noise reduction benefit.

The Hilton has hotel rooms 50 feet from the Wanda site and dozens of rooms have balconies and windows opening to the Wanda project.

The “fabric sound wall” will provide NO mitigation of noise impact to virtually any of these rooms. Nighttime construction would be a serious disaster for the Hilton and adjacent residential communities.

Table of Contents for LST

Index of Files for the Planning Commission's and Staff's Consideration of the New Wanda Hotel, Destination Restaurants, Bars, Lounge, Spa and Condominium Project

1. File folder containing (i) spreadsheets with the Peninsula Hotel and Montage Hotel loading truck service counts (along both Canon Dr. and Wilshire Blvd.) from 9/9/16 to 9/15/16, and (ii) 24-hour surveillance videos of the Montage Hotel's Canon Dr. loading dock from 9/9/16 to 9/11/16
 - *These videos and data show that Wanda's estimates for the truck traffic that will result along Merv Griffin Way are inaccurate based on the current requirements for loading and service truck access to the Peninsula and Montage hotels.*
2. Example pictures of service vans
 - *The pictures depict the vehicles identified as "vans" leaving the Montage Hotel.*
3. Time lapse videos looking east and west along Santa Monica Blvd.
 - *The videos show the heavy traffic conditions along Santa Monica Boulevard, which will make it impossible for cars and construction vehicles to make unsignalized left turns safely and efficiently.*
4. Video of trucks making turns onto Merv Griffin Way
 - *The videos show that to make a turn from Santa Monica and Wilshire Boulevards onto Merv Griffin Way, loading and service trucks must cross into the right-of-way for oncoming cars which will tie up traffic and create dangerous condition.*
5. Graphic images and animations of truck turn requirements for the Project's loading dock
 - *These images demonstrate that the service trucks entering into Wanda's proposed loading dock will need to make an illegal turn from an outside lane in order to avoid driving over the curb along Merv Griffin Way. If the trucks attempt to make the turn from the legally required lane, they must cross over the curb, creating a dangerous condition for pedestrians and other vehicles. The graphic images show that the turn radius requirements for trucks entering onto Merv Griffin Way from Santa Monica Boulevard and Wilshire Boulevard must cross into outside traffic lanes to avoid driving on the sidewalk.*
6. Construction truck requirements for the Project
 - *Wanda's assumptions for the number of construction truck trips required for the Project are underestimated.*
7. Construction schedule for the original Beverly Hilton Project and the proposed Beverly Hills Garden and Open Space Project
8. Beverly Hilton event data
 - *Wanda's assumptions for events at the Beverly Hilton underrepresented the potential for traffic impacts due to guests arriving at the Beverly Hilton and the Wanda Project simultaneously.*

9. Motor Court Option 1 from EIR
 - *Wanda's site plan shows that the western roadway along the LA Country Club is already going to be used for loading truck service and the Project is not proposing to separate service truck. There is no need to separately locate the Project's hotel loading dock on Merv Griffin Way.*
10. Unresolved Parking Issues
 - *There remains numerous problems with the Project's proposed parking plans, which the Commission must address.*
11. Data on the schedule of time required for the City's approval of the EIRs for the original 9900 Wilshire Blvd. Project and the Montage Hotel Project
 - *The extensive and lengthy process the City required the original 9900 Wilshire Project and the Montage Hotel to undergo demonstrates the Commission's consideration of Wanda's new Project is being rushed and the process should slow down to allow for adequate review, public comment and deliberation.*
12. 9212 Report on the Beverly Hills Garden and Open Space Project
 - *This City-prepared report analyzes the construction timeline, traffic patterns, access and circulation plans for the Beverly Hilton Project.*
13. Overland Report (March 30, 2016)
 - *Identifies the access plans for the Beverly Hilton Project.*
14. Beverly Hilton Site Plans
 - *Depicts the access points for the approved Beverly Hilton Project and the proposed Beverly Hills Garden and Open Space Project.*
15. Outstanding Staff requests for Commission to address
 - *Planning Commission Staff has asked for specific direction from the Commission on numerous issues that require attention and resolution. The listed items remain outstanding.*
16. Key questions and issues for Staff to resolve
 - *This list contains a brief overview of the countless issues that must be resolved and provided in order for the community and the Commission to adequately assess the Project's potential impacts.*
17. Beverly Hilton employee staff figures & parking requirements
 - *Data from the Beverly Hilton employee parking requirements demonstrate that Wanda's projection that only 40 onsite parking spaces will be sufficient for its staff is unrealistic.*
18. Sound Wall graphics
 - *Shows the unsightly aesthetic condition that the Project will subject the community to as a result of its plans for nighttime construction.*

19. Beverly Hilton loading dock truck traffic report

- *Shows that during the period between 2-7-16 and 2-13-26, the total deliveries required for the week was 307, averaging to 51 deliveries each weekday.*

20. Modifications to the Project's Conditions of Approval

- *This document contains certain changes to the Project's Conditions of Approval that should be incorporated into the Specific Plan.*

21. Wanda Group's unsupported assumptions, conclusions and data

- *This document contains a list of the numerous flaws in the data and assumptions Wanda provided to Staff which the EIR has improperly relied upon.*
