INTRODUCTION

At today's meeting, a presentation will be made by Mark Olson, Senior Regional Manager Public Affairs for Southern California Edison.

DISCUSSION

Mark Olson will make a presentation to the City Council on the following:

- current state of the utility,
- general project updates,
- power predictions for the summer months, and
- emergency planning, response and recovery procedures.

Mr. Olson recently provided a presentation to City Department Heads and the Public Works Commission. On April 19 the Office of Emergency Management attended an emergency planning, response and recovery meeting held by Southern California Edison. This meeting, which was designed to provide cities with important information on Edison's plans, procedures and ability to respond and recover their operations during and after an emergency or disaster, was informative and worthwhile.

FISCAL IMPACT

None that staff is aware of at this time.

RECOMMENDATION

None
