

STAFF REPORT
CITY OF BEVERLY HILLS

**For the Architectural Commission
Meeting of September 21, 2011**

TO: Architectural Commission

FROM: Shena Rojemann, Associate Planner

SUBJECT: LANVIN
200 N. Rodeo Drive
Request for approval of a sign accommodation to allow multiple business identification signs
(PL111 2725)

PROJECT INFORMATION

Applicant	AKC Services
Address	200 N. Rodeo Drive
Project Name	Lanvin
Project Type	Sign Accommodation Multiple for Business ID signs

PROJECT DESCRIPTION

The project is located on the east side of the 200 block of North Rodeo Drive, between Dayton Way and Wilshire Boulevard. The existing storefront contains on business identification wall sign reading "Lavin". The applicant is requesting a sign accommodation to allow the addition of one new business identification wall sign. The new sign would be located towards the top of the building elevation.

Business Identification Signs:

The applicant is requesting a sign accommodation for multiple business identification signs along the front elevation. Pursuant to the Beverly Hills Municipal Code §10-4-604, the Architectural Commission may grant a sign accommodation to allow multiple business identification signs in place of the individual signs otherwise permitted along the façade elevation, so long as the total sign area does not to exceed 100 square feet. The applicant is proposing the following new sign:

- One reverse channel business ID sign located toward the top of the building façade. This sign would read "LANVIN" and would be internally illuminated. The sign would be a total of 4.99 square feet. This letters of this sign would each contain a gold satin face and gold satin return, which is the same material as the existing wall sign.

The applicant plans to maintain the existing signage on the façade which includes:

- One business ID sign located toward the middle of the building façade elevation. This sign reads "LANVIN" and is internally illuminated. The sign is 5.25 square feet.

- Three signs on the awning valances, parallel to the building façade, that read “LANVIN”. The maximum letter height for each sign on the awning is 5-¾”.

BUSINESS IDENTIFICATION SIGNS			
Type of Sign	Permitted by Code with a Sign Accommodation	Permitted by Code without a Sign Accommodation	Proposed
Business ID Signs on the Front Elevation	Multiple business identification signs not to exceed 100 SF	1 sign – maximum 64 SF and one smaller sign not to exceed 5 SF (for business name, address and other operating hours) (2 SF/1 linear foot of store frontage. Linear frontage = 32'-0")	15.16 SF (2 wall signs and 3 awning valance signs)
Awning Signs	Not part of this request	Multiple signs with the letter height not to exceed 7” in height.	3 signs, each with maximum letter height of 5-3/4”

A material board will also be presented at the meeting.

ANALYSIS

The proposed sign is intended to increase the visibility of the current tenant to customers. The proposed signage is composed of high quality materials and a color that is cohesive with the existing signage and building façade. The use of high quality materials and color shall be cohesive with, and sometimes superior to, the signage found along North Rodeo Drive. The proposed design offers a revitalized appearance with a clean finish and is consistent in quality with the other signs in the area.

ARCHITECTURAL CRITERIA

Pursuant to Municipal Code Section 3-3010 the Architectural Commission may approve, approve with conditions, or disapprove the issuance of a building permit in any matter subject to its jurisdiction after consideration of the following criteria:

- (a) The plan for the proposed building or structure is in conformity with good taste and good design and in general contributes to the image of Beverly Hills as a place of beauty, spaciousness, balance, taste, fitness, broad vistas and high quality.***

The proposed signage is of high quality materials and is simplistic in design. The design appears in keeping with, and in some cases may be superior to, the quality of nearby shops and other businesses. The proposed signage appears to be in conformity with good taste and good design and in general contributes to the image of Beverly Hills as a place of beauty, spaciousness, balance, taste, fitness, broad vistas, and high quality.

(b) The plan for the proposed building or structure indicates the manner in which the structure is reasonably protected against external and internal noise, vibrations, and other factors which may tend to make the environment less desirable.

The installation of new signage does not appear to modify any existing barriers to external or internal noise and is not anticipated to make the environment less favorable.

(c) The proposed building is not in its exterior design and appearance of inferior quality such as to cause the nature of the local environment to materially depreciate in appearance and value.

The materials proposed for the new signage do not appear to be inferior in quality or execution and would therefore not degrade the local environment in appearance or value.

(d) The proposed building or structure is in harmony with the proposed developments on land in the General area, with the General Plan for Beverly Hills, and with any precise plans adopted pursuant to the General Plan.

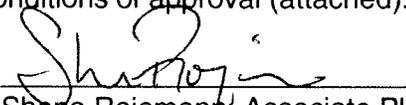

The proposed is in conformity with the prevailing uses in the general area and with other similar projects approved by the Commission. Furthermore, the overall composition and design of the signage would be in harmony with proposed or future uses in the area as would be allowed in compliance with the current General Plan for Beverly Hills, and with any precise plans adopted pursuant to the General Plan.

(e) The proposed building or structure is in conformity with the standards of this Code and other applicable laws insofar as the location and appearance of the buildings and structures are involved.

Subject to review of the final construction documents, the proposed signage are in conformity with the standards of the Beverly Hills Municipal Code and other applicable laws insofar as the location and appearance of the buildings and structures involved.

RECOMMENDATION

Based on the foregoing analysis and pending the information and conclusions that may result from testimony received at the public hearing, as well as Architectural Commission deliberations, staff recommends the Architectural Commission either provide the applicant with further direction and return the item for restudy, or approve the project with any conditions the Commission may wish to add, in addition to the standard conditions of approval (attached).

Exhibit A – Standard Conditions of Approval

EXHIBIT A
Standard Conditions of Approval

1. Final plans shall substantially conform to the plans submitted to and reviewed by the Architectural Commission on September 21, 2011.
2. This approval by the Architectural Commission is for design only; the project is subject to all applicable City regulations for the construction of the project (including zoning, building codes and Public Works requirements.)
3. Any future modifications to this approval shall be presented to the staff liaison for a determination as to whether the change may be approved by staff (minor) or requires review by the Commission. Changes made without City approval shall be required to be restored to match the City approved plans.
4. Any projections within the public-right-of way shall be reviewed and approved by the Public Works and Transportation Department.
5. A copy of the City's approval letter shall be scanned onto the final plans.
