

CITY OF BEVERLY HILLS
TRAFFIC & PARKING COMMISSION

December 6, 2012

TO: Traffic & Parking Commission
FROM: Martha Eros, Transportation Planner
SUBJECT: Bicycle Racks – Conceptual Designs

At the November 13, 2012 Study Session, the Beverly Hills City Council provided staff direction to proceed with implementation of a citywide bicycle rack program.

The TPC and City Council recommended a custom-designed rack that reflects the City's unique character and branding. Staff is currently working with the Graphic Arts department in developing conceptual designs for a custom bicycle rack, and will consider functionality, safety and user-friendly elements for the bicycle racks.

Pending development, staff will present preliminary/draft designs for the Traffic & Parking Commission's review.
