

CITY OF BEVERLY HILLS
TRAFFIC & PARKING COMMISSION

August 6, 2015

TO: Traffic & Parking Commission
FROM: Aaron Kunz, Deputy Director of Transportation
SUBJECT: North Santa Monica Boulevard Construction Mitigation

The City Council continued their review of the Santa Monica Boulevard Reconstruction project at the 50% design drawing phase at the July 21, 2015 Study Session. City Council provided direction to proceed with 1) widening the roadway by 5'4" on the south side of the roadway between Canon Drive and Wilshire Boulevard; 2) including swales adjacent to the north side of the roadway and 3) selecting a "single acorn" street light (with additional street lighting for pedestrians). The City Council also provided direction to pursue traffic mitigation options related to removal of on-street parking spaces and revised lane configurations along south Santa Monica Boulevard.

For further development of traffic mitigation measures, staff recommended that the Traffic & Parking Commission conduct two public outreach meetings (one daytime for the business community and one evening for residential). Staff is identifying available dates for the Commissioners with the intention of finalizing the date(s) at the August 6, 2015 meeting.
