

CITY OF BEVERLY HILLS
PUBLIC WORKS SERVICES DEPARTMENT
MEMORANDUM

TO: PUBLIC WORKS COMMISSION

FROM: Michelle Tse, Senior Management Analyst 

DATE: October 9, 2014

SUBJECT: Status Report – Foothill Well Project (CIP 0916)

This capital improvement project is intended to develop additional groundwater supply for the City from the shallow aquifer system near the City's Water Treatment Facility on Foothill Road. Proposals for design services associated with developing a water production well, wellhead facilities and a water conveyance system were received from three consulting firms. City staff and Commissioner Felsenthal are in the process of interviewing and negotiating the scope of work and cost with the most qualified firms. Staff intends to recommend the selection of a consultant for design services and permitting to City Council in November 2014.

The City Engineer, Mark Cuneo, will be present at the October 9, 2014, Public Works Commission meeting to answer any questions.
